

## Reserve Your FREE Copy of Windows 10 Today!

As of today, the new Windows 10 Operating System is officially available as a free download for eligible customers! Early reviews are already praising it as one of the best operating systems ever, across any platform. Despite the many benefits of Windows 10, the upgrade process could cause your computer to stop functioning if it's not prepared for this update.

In case you haven't seen our previous emails, here's a quick reminder of the important Windows 10 preparation checklist.

**Before you upgrade to Windows 10, it is highly recommended that you make sure:**

1. All of your important data is backed up
2. Your computer's hardware is compatible with the new Operating System
3. Your computer is currently clean of viruses & other malware
4. You are registered for the upgrade

To assist you in completing this checklist, Tech 2U is offering FREE diagnostics remotely and in our shop to confirm your PC is prepared for this update.

As with any major software launch, there will most likely be hitches with Windows 10. As certified experts of operating system upgrades, we can resolve any issues that arise once the new operating system is installed.

If for any reason your computer doesn't meet the requirements for Windows 10, it isn't necessarily a permanent problem. Microsoft is rolling Windows 10 out in stages, and each stage will broaden its compatibility. We can monitor the specifics of each roll out stage so you don't have to.

We anticipate this being the busiest time of the year, and our schedule is already filling up! So call us as soon as possible and schedule an appointment. We can be reached at **1-888-931-0942**. We're here to help!

We Fix Any Tech Problem!
